EXPERIENCE

Software Developer | Freelance | Remote

- [Open Weather Map](#)

Using C# .Net 6 console app with use of API, I have created a weather forecast app to check the current status of the weather by entering the 5 digit zip-code. Once the zip-code is entered the app will return the city of the zip-code, temperature, what it feels like, and weather description.

Software Developer | Freelance | Remote

- [Personal Portfolio Website](#)

This is my responsive personal front-end focused portfolio website using JavaScript, HTML, and CSS along with FormSubmit built in for users to contact me. Informative and encapsulates an about me section along with links to my projects.

E-Commerce Website | Remote

- [Personal E-Commerce](#)

With use of ASP.Net Core MVC- connected to personally built MySQL database. CRUD operation applied into the website, I am able to create/review/update/delete products in the web and will reflect into MySQL database.

Homepoint Financial | TPO Operations-Closer | Remote

- Maintain compliance with all company policies and procedures using SaaS software
- Excellent communication and follow up skills in Agile environment
- Client facing role alongside cross-functional team communication
- Proficient in Microsoft Outlook, Teams, Word, Excel
